Individuals will be able to register for one or two 1/2 day optional tutorials. There will be 7 concurrent sessions in the morning and 7 concurrent sessions in the afternoon. Fee includes one hardcopy tutorial materials and one CD of all tutorials. Lunch is included in registration fee for Delegates registering for two tutorials. Delegates attending one tutorial only have the option to purchase a lunch ticket during on-line registration for \$20. Tutorial participants must register for the ISMB 2006 conference.

08:30am-12:30pm Morning Session

- AM1: Biological literature mining - from information retrieval to biological discovery, Lars Juhl Jensen, EMBL, Germany
- AM2: Genomes, Browsers and Databases: Tools for Automated Data Integration across Multiple Genomes, Peter Schattner, University of California, Santa Cruz, USA
- AM3: Python programming for Life Science researchers, Sebastian Bassi, Universidad Nacional de Quilmes, Argentina
- AM4: Cheminformatics Pierre Baldi, University of California, Irvine, USA
- AM5: Computing Biological Function: Bioinformatics approach to the analysis and prediction of protein function, Yanay Ofran and Marco Punta, Columbia University, USA
- AM6: Integration and Analysis of Diverse Genomic Data, Olga Troyanskaya, Princeton University
- AM7: Exploring Computational Biology with a Massively Parallel High Performance Computing Environment, Kirk Jordan, IBM, USA and Srinivas Aluru, Iowa State University, USA

02:00-06:00pm Afternoon Session

- PM8: Bayesian networks for bioinformatics: an introduction to inference and learning, Chris Needham and James Bradford, University of Leeds, UK
- PM9: From Pathways Databases to Network Models, Baltazar Aguda and Andrew Goryachev, Bioinformatics Institute, Singapore
- PM10: Introduction to Computational Proteomics Open Problems, Jacques Colinge, Upper Austria University of Applied Sciences at Hagenberg, Austria
- PM11: Computational Biology of Post-transcriptional Gene Regulation: at the Interplay of Genomes, Networks and Evolution, Uwe Ohler, Duke University, USA and Dirk Holste, University of Vienna, Austria
- PM12: Automatic online data integration pipelines with Expression Profiler for bioinformatics programmers, Misha Kapushesky, European Bioinformatics Institute, UK
- PM13: Protein-protein interactions: structure and systems approaches to analyze diverse genomic data, Anna Panchenko and Benjamin Shoemaker, National Center for Biotechnology Information, USA
- PM14: Maximize Genomics Throughput with Data-Activated Processing, Stephen Perrenod, eXodus Technologies Inc., USA and Ulrich Meier, Sun Microsystems GmbH, Germany
